2010 FRUIT LIST

Fruit Trees

All Fruit Trees 45.00
Other trees will be marked individually.

Small Fruits

All Raspberries and Blackberries..... 7.99 ea.
 5/35.00
 10/60.00

Strawberries
 Bdl. of 25 14.99
 Blueberries 13.99
 Grapes (std.)..... 6.99
 Seedless..... 9.99
 Rhubarb 11.99
 Horseradish 5.99
(Prices subject to change - (higher or lower depending on availability)

CULTIVARS AVAILABLE

APPLES (2 varieties for pollination)

Early-Season

Yellow Transparent
 Zestar
 Gravenstein

Mid-Season (September)

Suncrisp
 Cameo
 Newton Pippin
 Royal Gala
 Honeycrisp
 Cortland
 Liberty (*disease resistant*)
 Macoun
 McIntosh
 Red Delicious
 Cinnamon Spice
 Empire

Late-Season (October)

Roxbury Russett
 Baldwin
 Wolf River
 Mutsu
 Red Fuji
 Granny Smith
 Arkansas Black
 Braeburn
 Northern Spy
 Pound Sweet

PEACHES (*self-fruitful*)

Early-Season

July Elberta
 Red Haven
 Reliance
 Scarlet Pearl

Mid-Season

Indian Blood
 Blushing Star
 Belle of Georgia (*white flesh*)
 Summer Pearl
 White Lady (*white flesh*)
 Loring

Late-Season

Cresthaven

PEARS (2 varieties for pollination)

Mid-Season

Bartlett
 Bosc
 Moonglow
 Maxine
 Summercrisp Pear
 Red Bartlett

Late-Season

Kieffer
 Anjou
 Seckel

ASIAN PEAR

Early-Season

Hosui

Mid-Season

Daisui
 20th Century
 Raja

Late-Season

Shinko

NECTARINES (*self-fruitful*)

Hardired Giant
 Red Gold
 Summer Beaut

SWEET CHERRIES (2 varieties for pollination)

Mid-Season

Blackyork
 Whitegold
 Hudson
 Blackgold
 Rynbrandt
 Kristin
 Royal Anne
 Regina

SOUR CHERRIES (*self-fruitful*)

Montmorency
 Balaton
 Danube

PLUMS (*somewhat self-fruitful, best results with another variety*)

European varieties

Green Gage
 French Prune
 Stanley
 Bluebyrd
 Damson
 Empress

Japanese varieties (*cross with another Japanese variety*)

Duarte
 Ozark Premier
 Simka
 Shiro
 Santa Rosa
 Alderman
 Elephant Heart

APRICOT

Chinese Dwarf
 Goldcot

PERSIMMON

Nikita's Gift

FIG

Brown Turkey

Fruit Trees

Site and soil requirement - Full sunlight, good drainage, but ample moisture. Avoid planting in cold pockets. pH of 6-7.0. Add cow manure and peat moss to soil when planting. **DO NOT** fertilize the first year. Can be planted as soon as soil is workable. Plant with the graft union above the soil level.

Planting distances - These charts are for your convenience as a general guide in determining how many mature fruit trees will fit in the planting area you have available. A mature fruit tree normally has a root system at least as wide as the tree is tall.

AREA PLANTING GUIDE

Pruning - Minimal at time of planting.

Feeding - One year after planting, fertilize with 1-2 lbs. of a good organic fertilizer in mid-April to mid-May.

Pest control - Use dormant oil spray to control overwintering insects. A combination of oil and lime sulphur will control disease as well as insects. We carry a complete line of organic pest controls to combat other pest problems throughout the season.

Small Fruits

Strawberries - Will grow in most any soil type with a pH of 5.5 to 6.5 Feed with a 5-10-5 fertilizer. Plant 18" apart in rows 3-4 feet apart. Remove flowers the first year for better production of fruit the next year. Mulch all plants with a loose, weed-free material such as salt hay or straw in mid to late November. Remove mulch from crowns in spring when new growth starts.

Raspberries and Blackberries - Will grow in most any soil type with a pH of 5.5 to 6.5 Set plants 24-30" apart in the row and have 8-10 feet between row. Fertilize with 1-2 lbs. of organic fertilizer per 100 square feet. Most varieties will benefit from the use of a trellis to keep canes upright and the fruit off the ground.

Blueberries - Grow best in an acid soil with a pH of 4.3 - 4.8. Soil should be well drained. At planting, space 6 feet apart in rows 6 feet apart. Begin pruning at the end of the third season to remove weakened or dead branches. Feed with Hollytone or an organic fertilizer. In addition sulphur should be added at least twice a year. Keep well mulched.

Grapes - Plant deep so that the soil level is just above the second bud, and cut canes back to 2 or 3 strong buds. After plant is established pruning is done when plant is dormant leaving long healthy canes of 100 buds to bear fruit. Feed with a good quality organic fertilizer such as Plant Tone.
