2012 FRUIT LIST

Fruit Trees

All Fruit Trees 49.99
Other trees will be marked individually.

Small Fruits

All Raspberries and Blackberries..... 7.99 ea.
 5/35.00
 10/60.00

Strawberries
 Bdl. of 25 14.99
 Blueberries 13.99
 Grapes (*Seedless*) 29.99
 Rhubarb 11.99
 Horseradish 5.99
(Prices subject to change -(higher or lower depending on availability)

CULTIVARS AVAILABLE

APPLES (2 varieties for pollination)

- Early-Season**
- Gravenstein
- Mid-Season (September)**
- Newton Pippin
- Royal Gala
- Honeycrisp
- Cortland
- Liberty (*disease resistant*)
- Macoun
- McIntosh
- Red Delicious
- Empire
- Wealthy
- Jonagold
- Late-Season (October)**
- Wolf River
- Red Fuji
- Granny Smith
- Arkansas Black
- Northern Spy
- Pound Sweet
- Haralson
- Prairie Spy
- Winesap
- Haralson

EDIBLE CRABAPPLE

- Whitney
- Firecracker

PEACHES (*self-fruitful*)

- Early-Season**
- July Elberta
- Red Haven
- Reliance
- Scarlet Pearl
- Mid-Season**
- Blushing Star
- Belle of Georgia (*white flesh*)
- Summer Pearl
- White Lady (*white flesh*)
- Loring
- Late-Season**
- Cresthaven

PEARS (2 varieties for pollination)

- Mid-Season**
- Bartlett
- Bosc
- Moonglow
- Red Bartlett
- Comice
- Summercrisp
- Late-Season**
- Kieffer
- Seckel
- Red Anjou
- Anjou

ASIAN PEAR

- Early-Season**
- Hardy Giant
- Mid-Season**
- Daisui
- Raja
- Chojuro

NECTARINES (*self-fruitful*)

- Hardired Giant
- Red Gold
- Mericrest
- Sunglo

SWEET CHERRIES (2 varieties for pollination)

- Mid-Season**
- Blackyork
- Whitegold
- Hudson
- Blackgold
- Rynbrandt
- Kristin
- Regina

SOUR CHERRIES (*self-fruitful*)

- Montmorency
- Balaton
- Danube

PLUMS (*somewhat self-fruitful, best results with another variety*)

- European varieties**
- Green Gage
- Stanley
- Damson
- Empress
- Italian Prune
- Japanese varieties (*cross with another Japanese variety*)**
- Shiro
- Santa Rosa
- Alderman
- Elephant Heart

APRICOT

- Chinese Dwarf
- Goldcot
- Wilson Delicious
- Blenheim

PERSIMMON

- Nikita's Gift
- Meader

FIG

- Brown Turkey

PLANTING THE BACKYARD GARDEN

Fruit Trees

Site and soil requirement - Full sunlight, good drainage, but ample moisture. Avoid planting in cold pockets. pH of 6-7.0. Add cow manure and peat moss to soil when planting. **DO NOT** fertilize the first year. Can be planted as soon as soil is workable. Plant with the graft union above the soil level.

Planting distances - These charts are for your convenience as a general guide in determining how many mature fruit trees will fit in the planting area you have available. A mature fruit tree normally has a root system at least as wide as the tree is tall.

AREA PLANTING GUIDE

Pruning - Minimal at time of planting.

Feeding - One year after planting, fertilize with 1-2 lbs. of a good organic fertilizer in mid-April to mid-May.

Pest control - Use dormant oil spray to control overwintering insects. We carry a complete line of organic pest controls to combat other pest problems throughout the season.

Small Fruits

Strawberries - Will grow in most any soil type with a pH of 5.5 to 6.5. Feed with a 5-10-5 fertilizer. Plant 18" apart in rows 3-4 feet apart. Remove flowers the first year for better production of fruit the next year. Mulch all plants with a loose, weed-free material such as salt hay or straw in mid to late November. Remove mulch from crowns in spring when new growth starts.

Raspberries and Blackberries - Will grow in most any soil type with a pH of 5.5 to 6.5. Set plants 24-30" apart in the row and have 8-10 feet between row. Fertilize with 1-2 lbs. of organic fertilizer per 100 square feet. Most varieties will benefit from the use of a trellis to keep canes upright and the fruit off the ground.

Blueberries - Grow best in an acid soil with a pH of 4.3 - 4.8. Soil should be well drained. At planting, space 6 feet apart in rows 6 feet apart. Begin pruning at the end of the third season to remove weakened or dead branches. Feed with Hollytone or an organic fertilizer. In addition sulphur should be added at least twice a year. Keep well mulched.

Grapes - Plant deep so that the soil level is just above the second bud, and cut canes back to 2 or 3 strong buds. After plant is established pruning is done when plant is dormant leaving long healthy canes of 100 buds to bear fruit. Feed with a good quality organic fertilizer such as Plant Tone.
